Summary

Passionate software engineering student with a special interest in Front-End Web development. Strong analytical, organizational, and communication skills. Proficient in an assortment of technologies involving JavaScript and web development.

Skills

- Javascript
- ReactJS
- Tailwind css
- Bootstrap
- ExpressJS
- UI/UX
- Python
- HTML
- CSS
- Mongodb
- MySql
- Wordpress

Experience

Internship Trainee - 02/2022 to 04/2022
Tevatron Technologies
- Training and Internship program in Web Development.
- Worked on understanding various Skills.
- Worked with various libraries including REACT , Bootstrap, JavaScript.
- Learnt about Html , CSS, JavaScript , Bootstap , MySQL
- Developed a project on "My Personal Portfolio"

Summer Trainee - 07/2022 to 08/2022
Aptron
- Training and Internship program in Basic & Advance Python.
- Built a Python Flask API to connect the model to a JavaScript web application using Azure App Service
- Developed a project on "Bank Management system.

Education

Bachelor of Technology: 7.267 CGPA Computer Science and Engineering – **2019 to 2023**
Babu Banarasi Das Engineering College, Lucknow

Intermediate: 76% UP Board, PCM – **2017 to 2019**
S.R Memorial Inter College

High School: 79% UP Board – **2015 to 2017**
S.R Memorial Inter College

Projects

Personal Portfolio
Personal portfolio is a web application using React JS
https://portfolio-app-5dba3.web.app/

- Based on a common personal portfolio web application.
- Developed by using React Js with Tailwindcss
- Deployed it on Firebase using firebase hosting.

Disney-plus Clone
A Disney-plus hotstar based web application made with React Native.
https://github.com/Harsh90Prajapati/Disney-web

- Making modular UI components using React Virtual DOM and JSX
- Managing routing and navigation using ReactRouterNative and ReactNavigation
- Dynamic data handling using state management through the React State Hook API
- Static data parsing and handling using React Props
- Firebase and Firestore integration for user authentication and data storage

Movie-Website
A Movie -website is a website developed by using HTML and CSS.
https://github.com/Harsh90Prajapati/movie-site

- Making UI using HTML and CSS
- Movie-website is a static normal website.

Dynamic Review Generator Using Sentiment Analysis
This project is a "Dynamic Product Review Using Sentiment Analysis". It is general idea of searching any given product by using on the basis of comment/review by user who already used the product or ordered from that specific site.

- Creating a web frontend to allow users to search for products
- Set up a custom sentiment analysis API that combines the results from various pre-trained available SA models
- Create a web scraper to fetch product review information from Amazon and FlipKart websites.
- once processed, store the generated sentiment report in a frequently updating cache
- Visualize the review data on frontend using Javascript visualization libraries
